

Student Employee Development & Success

DSAESPRACTICE has put together a catalog of digital resources around Student Employee Development & Success. We hope that it can give more insight on how to help student employees better understand their role and purpose, as well as inspire a push for their professional development.

About Student Employee Development & Success:

Student Employees are students who work within a department on a college campus while completing courses at the University. As financial gain may seem to be the biggest benefit in student employment, they also have ample opportunities to gain work experience, transferable skillsets and networking skills. Prioritizing the professional development of our student employees can benefit everyone: a more efficient department, wiser leaders and prepared students going into their careers.
