

Center for Student Media

FY2017 One Time Request

In 2015, The Center for Student Media launched the Media Services initiative offering video production and photography services to campus departments and organizations. So far this has been very successful, producing videos for Veteran Services, The Dean of Students Office, The DSAES Orientation teams, Center for Diversity and Inclusion, Center for Student Involvement and many others. Due the very successful increase in Student Video Network programming, there has been an increased demand for equipment resources because of that, we are making an equipment request based on Media Services equipment and technology needs for production of our client work.

1. \$11,029.19 for Video Services Production Equipment
