

Additional One-Time Request

FY 22-23

A.D. BRUCE RELIGION CENTER

Audio/Video

SFAC FY23 Additional One-Time Request (b)
A.D. Bruce Religion Center

Audio/Video Update – AD Bruce Religion Center

This request is to provide updated AV system in the University Chapel of the A.D. Bruce Religion Center in support of DSAES Strategic Initiative [Resources] via evaluate, actively pursue, and leverage resources to enhance the UH experience.

The Religion Center’s most popular and most frequently used venue is the University Chapel. Not only does the University Chapel host weekly worship services year round, but it also is the primary building venue for weddings. With such regular use as this, the sound system plays a vital role in event success. That said, our existing system has unfortunately seen more recent failures and has shown its age unfortunately when groups have needed it most. Not only is this resource issue but it’s a reputation issue for A.D. Bruce Religion Center and the University of Houston. When our guests come to our facilities there is an expectation that our equipment and systems will work. And that our services will raise the level of hospitality to where they will only pass forward our venue with a glowing recommendation.

Our current system is over 10 years old. Audio technology has come a long way in that time and its time for use to invest in the services that our students and visitors expect. The upgraded AV system would include the following:

- Biamp Systems TesiraFORTE DAN AI Fixed I/O DSP with 12 analog inputs, 8 analog outputs, 8 channels conf...
- Shure AD4QUS=A Four--channel receiver. Includes AD4Q, locking power and jumper cables, BNC bulkhead...
